Course Description

This course introduces the science of nutrition. The format consists of a series of lectures, assigned readings and assignments that cover the fundamental concepts related to basic nutrition. The course examines how to interpret dietary labels; make informed food selections for a healthy, well-balanced diet; and understand the relevant human physiological processes that transform food after the first bite. The course discusses topics including nutrition in health and human physiology, vitamins and minerals, protein, carbohydrates, dietary fats, and energy metabolism.
