Course Description

Is knowledge of the world possible? And is there even an objective world for our knowledge to be about? These are the topics of skepticism and relativism. Skeptics challenge our ability to know anything about the world. Relativists contest that there is no absolute, objective truth. In this class, we will study both historical and contemporary thinking about these perennial topics. We will address ancient arguments for skepticism, but also look to more contemporary relativistic thinking about science, morality, and other matters.
