UCEAP Semester Units

4.00

Course Description

This course introduces students to the important principles relevant to medical entrepreneurship. It guides them through the relevant theories underpinning entrepreneurial practice. The ethical framework governing medical entrepreneurship is explored, which allows students to understand potential unintended consequences of innovation. Using small group work, students collaborate and develop their entrepreneurial ideas, culminating in an assessed presentation to the cohort during their final week. Through this, students develop their own teamwork, communication and leadership skills with a focus on creativity and design.
