Course Description

Psychology is the scientific study of processes underlying human behavior, such as sensation and perception, learning and thinking, motivation, and emotion. It covers a broad range of topics, and the purpose of this course is to provide a general survey of those topics. It is difficult to cover the many topics of psychology in a survey course, and it involves a lot of work and time. For some of you this may be your only exposure to psychology, but for others it will lay the groundwork for more advanced courses.
