Course Description
This course introduces accounting and its role in business from the perspective of a decision maker. Topics include key financial and managerial accounting concepts, the accounting process and the recording of business transactions, alternative accounting method choice for key assets and managerial incentives associated with method choice, the analysis and interpretation of financial statement data, cost accounting and reporting systems, and cost analysis for planning, control, and decision-making. This course is designed to meet the needs of undergraduate students from all disciplines.
