UCEAP Quarter Units 9.50
UCEAP Semester Units 6.30

Course Description

The course describes some of the key models, concepts and applications of clinical psychology. The course discusses topics including theories and models in clinical psychology; multidimensional assessment in clinical psychology; clinical features and etiopathogenetic mechanisms of some of the most prevalent mental disorders; description of the main interventions and their mechanisms in clinical psychology; and examples of clinical formulation and discussion of clinical cases. The course requires students to have completed at least one year of study in the field, specifically on courses in General Psychology, Brain and Behavior, and Developmental Psychology across Cultures, as a prerequisite.
