## Course Description

This course offers an introduction to Italian culture and Florence's rich history and traditions through a hands-on approach. Florence is a complex city with many identities. It is known as the cradle of the Renaissance, but its structure was shaped in the middle ages, in the 19th century, and in recent times. It is an international place, visited by tourists from all around the world, but still maintains a sense of pride in its own traditions. In the Culture section of this course, students explore the city through a series of on-site lectures, understanding its structure and its development through the centuries up to today, discovering the significance of its beautiful monuments and the scars left by its fascinating history. The Language component of the course provides students the tools and skills to navigate the city and complete tasks in real-life situations and specific contexts. Through small-group works they acquire basic communicative structures and learn to react effectively to authentic communicative situations.
