Course Description

This course presents the main characteristics of the French school system, with a focus on elementary school. It includes a theoretical part and an application part, through the participation of students in an introduction to their native language and culture for elementary school pupils. The topics presented in the theoretical part include: organization of the French school system (in a comparative perspective); focus on a French characteristic: nursery school; inclusive education and the schooling of children with disabilities; the case of allophone pupils and openness to other languages at school. This course provides insights of the French school system and prepares exchange students to speak in front of primary school pupils as part of a multicultural team. Students reflect on aspects of their native culture and language that it would be relevant to share with the pupils.
