6.00

UCEAP Semester Units
4.00

Course Description

This course examines in depth the extensive structural and economic changes which have characterized Sweden since the mid-18th century and the concept of "The Swedish Model". This takes the form of a chronological analysis of the rapid transition from a typical poor agrarian society to an industrial welfare state. The course considers the following questions: Which were the driving forces behind the development? Why did they occur so late? Which were the production factors so favorable to Sweden?

Language(s) of Instruction
English
