Course Description
This course is about a changing China. The focus is the ongoing social, economic and political transformation and the impacts of the reforms on China's people and environment. The course covers three sets of topics: Urban geography and China (housing and land reforms, changing morphology from socialism to capitalism, urban enclavism and gated communities, migrant workers and urban villages); China's economic development (Open door policy and geography of "Made in China"; Wenzhou Model, Pearl-River-Delta Model, state-owned enterprises, inequality, poverty alleviation and migration, rural development and governance); and China's environment challenges (water management, environmental governance, and climate change).
