UCEAP Transcript Title
EUROPEAN LAW

UCEAP Quarter Units
4.50

UCEAP Semester Units
3.00

Course Description

This course provides an overview of the origins and the evolution of the European Union’s legal system, as well as the main features of its governance framework. It also provides an opportunity to debate relevant questions and news items as they unfold during the course. Considering the strong influence European norms have on national legal systems today, the knowledge acquired in this course is useful both to more advanced study in European Union law and to better understand how national and European norms are defined and how they should be applied. The course provides the key to understanding current debates related to democracy, economic integration, and the respect of the rule of law within the European Union.
