**UCEAP Course Suffix****UCEAP Official Title**

DIGITAL TECHNOLOGIES IN EDUCATION

**UCEAP Transcript Title**

DIGITAL TECH IN EDU

**UCEAP Quarter Units**

8.00

**UCEAP Semester Units**

5.30

## Course Description

This course examines the increasing role that digital technologies play in society and education and considers the implications of this for education. It explores educational theory and debates around the value of such technologies in the educational process. Students examine arguments that suggest that millennial learners (Gen Z, the net generation) are differently wired and so education needs to be radically overhauled to take account of these changes. Students explore different digital technologies and consider their value for education and meeting the needs of these millennial learners. They look at tools like blogs and wikis, digital games, virtual and augmented reality, mobile devices, or artificial intelligence as examples of modern digital tools.

## Language(s) of Instruction

English
