Course Description

This course is about money and Central Banking: what money is; how it is created; how it moves around and what impact it may have on the economy. Students are introduced to the basics of money creation, the role of Central Banks, the theory of inflation and monetary policy. The following topics are analyzed: the impact of digital technologies on the forms and nature of money; the recent actions of major Central Banks to address the consequences of the Covid crisis and their long run implications; the relationships between money, the Governments, and the society in this new environment
