6.00

**UCEAP Semester Units**

4.00

## Course Description

In this course, students develop, plan, manage, and control projects successfully in a business environment. This requires an awareness of general project management principles, methodologies, and the tools and techniques as applied within multi-disciplined projects, specifically to large IT projects. They also examine formal approaches to managing risk, opportunity, uncertainty, and value in these projects.

## Language(s) of Instruction

English
