COURSE DETAIL

BEHAVIORAL BIOLOGY
Country Singapore
Host Institution National University of Singapore
Program(s) National University of Singapore
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Biological Sciences
UCEAP Course Number 167
UCEAP Course Suffix
UCEAP Official Title BEHAVIORAL BIOLOGY
UCEAP Transcript Title BEHAVIORAL BIOLOGY
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course is primarily about what animals are doing (ethology) and why they do what they do (behavioral ecology). Thus it provides an in-depth coverage of the relationships that organisms have with each other and with the environment. Selected key concepts in organismal interactions, illustrated with examples from general diverse animals and ecological systems, to ultimate and proximate explanations of animal interactions and other life history characteristics are covered. Students are provided with an opportunity to practice how scientific logic promotes effective thinking and leads to convincing conclusions. Students are also provided a chance to assimilate and critically evaluate contemporary literature and studies on relevant current issues.

Language(s) of Instruction
English
