UCEAP Official Title
FIELD METHODS IN ARCHAEOLOGY

UCEAP Transcript Title
FIELD METHODS:ARCOL

UCEAP Quarter Units
6.00

UCEAP Semester Units
4.00

Course Description
This course outlines field methods in archaeology through practical experience and theoretical investigation. It covers theoretical underpinnings for the field methods employed and the legislative framework for archaeological practice in New Zealand and globally. It requires students to engage with literature on key issues in New Zealand archaeology and methodological debate relevant to your case study. Students use the Ahuahu Great Mercury Island archaeological project as the data set for their case studies. The assessment for the course is designed to reflect the research process of archaeology. Students submit a final piece of writing as though they would submit it to a peer-reviewed academic journal and present it at a conference.
