**Course Description**

This course offers an l introduction to public and environmental health practices in Botswana. The course covers local issues with a focus on the Primary Health Care (PHC) approaches. The PHC aspects include infectious diseases, health promotion, safe drinking water supply, food safety, and basic environmental sanitation. These topics focus on the different health challenges facing Botswana, its population, and the root social and biological causes of these challenges. Historical examples of important health challenges are used to illustrate the nature, role, and organization of public and environmental health. The course also covers aspects of sustainable development regarding health issues/concerns in Botswana.
