

# COURSE DETAIL

## MOLECULAR BASIS OF DISEASE

**Country**

United Kingdom - England

**Host Institution**

University College London

**Program(s)**

University College London

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Health Sciences Biological Sciences

**UCEAP Course Number**

140

**UCEAP Course Suffix****UCEAP Official Title**

MOLECULAR BASIS OF DISEASE

**UCEAP Transcript Title**

MOLEC BASIS/DISEASE

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course provides a comprehensive overview of the diverse genetic, cell, and molecular mechanisms underlying human disease. It provides a thorough understanding of the complex mechanisms underlying common and rare human diseases, and how unravelling mechanisms can lead to applied medical science, and the development of targeted treatments resulting in clinical solutions for diverse human conditions.

## Language(s) of Instruction

English

## Host Institution Course Number

MEDC0010

## Host Institution Course Title

MOLECULAR BASIS OF DISEASE

## Host Institution Course Details

<https://www.ucl.ac.uk/module-catalogue/modules/molecular-basis-of-disease/MEDC0...>

## Host Institution Campus

UCL

## Host Institution Faculty

## Host Institution Degree

## Host Institution Department

Division of Medicine

## Course Last Reviewed

2019-2020
