3.70

**Course Description**

This introductory course combines practical guidance and academic theory to provide students with a thorough grounding in the use of financial statements for investment analysis and banking. It addresses the key aspects of accounting relevant to equity analysts, mergers & acquisition (M&A) bankers, asset managers, and other capital market participants. The delivery of the course is based around short technical sessions reinforced with numerical exercises, practical case studies, press articles, and video extracts. Additionally, the course involves guest speakers (in person or pre-recorded), such as a sell-side analyst and an investment banker, to help students understand the various financial services roles as well as the relevance of accounting information.
