GRAPHIC SKILLS

UCEAP Quarter Units
6.00

UCEAP Semester Units

4.00

Course Description

Students are introduced to a range of graphic skills that can be used to observe, record, and analyze urban settings in order to substantiate proposals for improvement. It combines the value of traditional free-hand sketching and technical drawing techniques with digital graphic tools and software, which are becoming increasingly important in the way we think, design, and communicate our ideas, in the contemporary information e-rich environment. Students work in small teams to develop their creativity and employ the practical skills taught in class to investigate an allocated urban streetscape in the surrounding area of UCL in London. They produce presentation panels that communicate coherent, clear, and legible information on urban analysis, before proceeding to produce a poster that reasons an inclusive environment proposal.
