MICRECON:MRKT&WLFRE

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

The course consists of a brief repetition, a deepening, and an extension of the microeconomic topics that have been discussed during the first year microeconomics course. The repetitive elements are introduced in a more analytical manner, substantiated by a number of formal exercises. New elements in the course are game theory, bargaining, auctions, choice under uncertainty, asymmetric information, and general equilibrium theory. Especially (constrained) optimization methods are important tools used throughout. Prerequisite knowledge of the first year microeconomics level is required.
