UCEAP Semester Units

3.30

Course Description
This course examines the role of political and economic issues in international relations. Specifically, it provides students with a critical introduction to the field of Global Political Economy (GPE) by examining the issues of: trade, production, governance, wealth/poverty/development, (in)security, and climate change. In doing so the course balances an understanding of theoretical debates and global historical trajectories with discussions about various topical issues and case studies.

Language(s) of Instruction
English
