5.30

## Course Description

This practical course encompasses both specialist skills and techniques from the jewelry and silversmithing industry in casting and modelling. The course also integrates design research and thinking alongside experience of working to professional competition briefs set by external organizations, agencies, and companies. During this project students learn carving and modelling techniques. Students are also introduced to different methods of casting metal from small-scale studios to larger foundries.

## Language(s) of Instruction

English
