Course Description
This course provides an understanding of key issues and applied methodologies relating to management accounting frameworks utilized by organisations. May be taken in the Fall Term (MSIN7016A) or in the Spring Term (MSIN7016) As such the content of the course provides the essentials a manager should have when faced with making hard-edged financial decisions in the context of the business environment. The focus is on cost management, budgetary control, and short and longer term financial decision making in the context of value for money resource management. The framework for management accounting is analysed in the context of providing managers in organisations with the information they need to be able to plan for and subsequently control operations. The emphasis is on making well-informed decisions, gaining insights into the blend of financial analysis and managerial judgment required to enable managers to make appropriate decisions.
