INTERNATIONAL TRADE

## **UCEAP Quarter Units**

6.00

### **UCEAP Semester Units**

4.00

### **Course Description**

This course provides an introduction to models of international trade and their predictions of trade patterns, with some consideration of empirical studies and policy issues. The course introduces students to classical and new theories of international trade; uses examples and empirical evidence to introduce students to the methods most commonly used in the economic analysis of international trade; and enables students to engage with trade theory in a critical manner, understanding the arguments used both in favor and against trade liberalization.
