Course Description

This course examines the study of preferences and experimental aesthetics within its historical context, the main themes of neuroesthetics and topics of debate in the field, and the methodologies used in the empirical study of aesthetics. The course discusses topics including the definitions of art, empirical aesthetics, Darwin and evolutionary perspectives, sensory systems , reward systems, scenes and landscapes, motion, color, faces and body, and current debates and future developments. The course requires basic knowledge of the foundations of cognitive psychology, of perception, and of the neural basis of behavior.
