Course Description

This course covers the concepts, theories, and techniques of new venture start-up, business modelling, and innovation management in the business sector. It examines the nature and importance of entrepreneurship and the typical characteristics of the entrepreneur. The generation of new business ideas, the shaping of business models, and the nature of innovation are outlined. The nature and importance of entrepreneurship, the entrepreneurial mindset, formulation of a viable business plan, the lean start-up process, and the raising of finance are central issues of the course. The management issues in the transition from start-up to growth are explained. This course also introduces students to the interdisciplinary and multifaceted field of innovation. By incorporating both theoretical and applied elements, the course provides an understanding of the concept of innovation and the tools and techniques for engaging in innovation within established organizations.
