6.00

UCEAP Semester Units

4.00

Course Description
This course is a bridge between the world of mathematics and science and the world of the humanities and the social and historical sciences. Students are exposed to game theory as a descriptive tool that is not bound by the topics of any single discipline. The most influential discoveries made in philosophy, politics, economics, finance, war studies, biology, psychology, law, and history are discussed.

Language(s) of Instruction
