Course Description

The course explores the basic concepts of global health, trends and indicators, determinants, and interventions to improve health. The world has moved from the era of International Health to Global Health with the understanding that the matters regarding health is inseparable in accordance to the national boundaries. Global Health refers to the idea of approaching health issues together as a global citizen and this brings efforts from various actors including state governments, international organizations, private foundations and non-governmental organizations to more. Recently, more non-health related actors are increasingly getting involved with the issues of global health with the rise of new infectious disease in addition to accelerating burden of non-communicable diseases. Today, the issues of Health is reaching major areas that used to be dealt in the realms that were considered irrelevant to health including economy, politics, and international relations.
