Course Description

This course introduces the entrepreneurial process of the technology industry in general. It examines the fundamental aspects of launching a technology entrepreneurial venture to complement the research and development activities in science and technology. The course explores the common practices in venture development process such as opportunity identification and verification, to technology transfer and commercialization. Topics on legal subjects (intellectual properties and patent laws) and simple financing and strategic approach in the business plan are covered. Lectures by local entrepreneurs is one of the important components of this course, in order to further nurture an entrepreneurial mindset via learning from real-life examples in this specific industry of technology.
