Course Description

Understanding sustainability broadly, the course explores how social entrepreneurship and innovation are a particular form of organizing toward social transformation. The course provides knowledge of how to explore and evaluate social entrepreneurship and innovations in theory and practice. Different theories and intellectual tools from social sciences are used to both understand the phenomenon of social entrepreneurship and innovation and apply them to the design of social entrepreneurial ventures in groups. During the theoretical part of the course, an introduction to the academic field of social entrepreneurship and important key concepts in social innovations are reviewed. Students work in groups to develop their own social enterprise.
