3.50

UCEAP Semester Units

2.30

Course Description
This course depicts how contemporary societies have tackled environmental problems. It addresses the first policy developments which paved the way for key principles and areas in environmental legislations as well as in international negotiations. A focus on actors and ideas completes this perspective, thus showing the forces shaping environmental politics. Topics covered include: political ideologies and Green political thought; environmentalisms, social movements, and political parties; public policies and Green states; international agreements and cooperation.

Language(s) of Instruction
English
