**Upper Division** 

## **UCEAP Subject Area(s)**

**Environmental Studies Biological Sciences** 

#### **UCEAP Course Number**

138

### **UCEAP Course Suffix**

#### **UCEAP Official Title**

**ECOLOGY OF NATURAL RESOURCES** 

## **UCEAP Transcript Title**

**ECOL/NATRL RESRCS** 

# **UCEAP Quarter Units**

5.00

#### **UCEAP Semester Units**

3.30

### **Course Description**

This course examines the ecological characterization of general environmental challenges and of different types of natural resources, highlighting concepts, approaches, and methods commonly used in diagnosis and management. The first of four course blocks provides basic environmental concepts and the different paradigms of conservation. The second block deals with the ecological bases for the use and conservation of natural resources. The third block addresses problems regarding the use of abiotic resources, and the last block examines issues of biodiversity, agrarian systems, and fisheries.

## Language(s) of Instruction

Spanish
