Course Description

This course examines the interaction of the environment with national and international development and identifies the elements and factors that intervene in political decisions and the creation of legal instruments for ecological conservation. Topics include: introduction to environmental studies (relation to social and political sciences, international relations, and main theoretical interpretations); international environmental and ecological law; (international treaties, general principles, and the environment as an element of human rights); international organizations (intergovernmental and non-governmental, international cooperation); regional environmental issues in Mexico.
