UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course critically explores the history and current state of political geography and geopolitics and examines empirical issues from the vantage point of the spatiality and materiality of politics and power. The course develops the complementary insights that politics and power are fundamentally spatial, that geographical phenomena have political dimensions and implications, and that geographic space is infused with both power and political potential.

Language(s) of Instruction
