Course Description

This course is a collective exercise to establish a portrait of each of the past ten presidential elections in France and create a systematic comparison with the 2021-2022 campaign and the 2022 vote. Through close investigation of these elections, the course examines fundamental, far-reaching elements in order to better understand the 2022 election. Studying the candidates, their platforms, their profiles, non-votes, votes against the system, the campaign, the context, and the debates, it identifies the most relevant criteria and establishes a description of each election to draw conclusions as to the elements that characterize the current campaign.
