COURSE DETAIL

DESIGN IN THE DIGITAL WORLD
Country United Kingdom - England
Host Institution King's College London
Program(s) King's College London
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Computer Science Communication
UCEAP Course Number 162
UCEAP Course Suffix
UCEAP Official Title DESIGN IN THE DIGITAL WORLD
UCEAP Transcript Title DESIGN IN DIG WORLD
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course addresses the two complementary topics of design and human-computer interaction: the design of digital resources and the methods of human interaction with them have significant effects on the ways in which these resources are understood, used, and perceived. Different modes of accessibility will affect the way that users are able to interact with and access the digital world. The course explores how design can support the user or exclude them. In understanding the methodologies behind digital design practices against the background of design theory, students learn to evaluate competing requirements to create their own designs while being able to critically assess existing designs.

Language(s) of Instruction
English

Host Institution Course Number
5AAVC209
