COURSE DETAIL

DISEASES OF AGING
Country United Kingdom - England
Host Institution University College London
Program(s) University College London
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Biological Sciences
UCEAP Course Number 127
UCEAP Course Suffix
UCEAP Official Title DISEASES OF AGING
UCEAP Transcript Title DISEASES OF AGING
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course will review what is known about the origins of the major diseases of ageing, in the context of new insights into the fundamental biology of ageing. It will work towards replacing the fragmented view of senescent pathologies that characterizes contemporary medicine, with an integrated overview of senescence (ageing), the diseases that it causes and their interrelationships. You will gain an insight into how the knowledge obtained through the study of the biology of ageing can be harnessed to achieve better health in older humans.

Language(s) of Instruction
English
