UCEAP Subject Area(s) Psychology
UCEAP Course Number 113
UCEAP Course Suffix
UCEAP Official Title APPLIED BEHAVIOR ANALYSIS
UCEAP Transcript Title APPL BEHAV ANALYSIS
UCEAP Quarter Units 4.00
UCEAP Semester Units 2.70

Course Description
This course provides an introduction to Applied Behavior Analysis (ABA) and examines its applications to rehabilitation, education, and developmental disorders. ABA is the process of systematically applying interventions based upon the principles of learning theory to improve socially significant behaviors. The effectiveness of ABA has been shown in a wide range of areas including education, special education, organizational management, parent training, occupational safety, sports psychology, and clinical psychology. While ABA can be used with a wide range of human behaviors, it is often recommended as the best-practice approach for working with people with intellectual disabilities or pervasive developmental disorders (e.g., autism).

Language(s) of Instruction
English
