UCEAP Quarter Units 5.50
UCEAP Semester Units

3.70

Course Description

This course offers a dynamic and comprehensive introduction to the systems and politics of global health in low and middle-income countries. Students examine critical challenges, including pandemics, ageing populations, pharmaceutical innovation, and the climate crisis, alongside the key determinants of health and their consequences for development. Students explore policies designed to improve health and development, the barriers to their implementation, and practical strategies to overcome these obstacles. Topics include global health governance, universal health coverage, health system strengthening, and the politics of disease burdens. The course also considers the impacts of migration, conflict, and climate change on health.
