3.00

Course Description
The focus of this course is on the relationship between globalization and major environmental damage issues. National, regional, and international policies and their effectiveness at mitigating adverse effects of globalization are discussed. The course also considers the necessity of regulations and political incentives. The last session of the course is devoted to a Desired City simulation. The course allows students to understand the complexity of society (Global Governance). Students use innovation and creativity to address public policy solutions to local and national environmental issues.
