3.70

Course Description

This course provides a broad, up-to-date introduction to the economic analysis of public policy issues. Drawing on microeconomic theory, the course focuses on the development of analytical tools and their application to key policy issues relating to the spending, taxing, and financing activities of Government. Particular emphasis is given to recent developments in public economics, including findings from current research, in areas such as behavioral public economics, new empirical methods, and policy innovations.
