4.00

## **Course Description**

This course enables students to apply both microeconomic and macroeconomic analysis to the assessment of current debates on financial and monetary issues. It provides a basic understanding of the following: the principles of bank management and their changing character in recent decades; strategies adopted by banks to address risk; the economic theory of bank intermediation; the role of banking in the financial system and in the wider economy; banking regulation and government intervention in the banking sector; theories and debates on the role and effectiveness of monetary policy; monetary aggregates, exchange rates, and inflation as targets of monetary policy; and the historical experience of UK monetary policy during the past three decades.
