UCEAP Course Suffix
UCEAP Official Title BIOPSYCHOSOCIAL DEVELOPMENT
UCEAP Transcript Title BIOPSYCHOSOCL DEVEL
UCEAP Quarter Units 8.00
UCEAP Semester Units 5.30

Course Description

The course provides a basis for understanding development in childhood and adolescence from a biopsychosocial perspective. The course focuses on interactions and associations between children's genetic dispositions, neurocognitive, and psychological factors. Psychosocial development is understood as a complex interplay between the individual and the environment. Of particular interests is the focus on early adversity, family risks, and social relationship. The syllabus and lectures address topics such as contextualized and dynamic developmental models, gene x environment interactions, risk and resilience factors for emerging mental health problems, social influences on brain and psychological development, and development of risk-taking. A general theme through the course is on developmental mechanisms and transactional processes.
