Course Description

This course introduces fundamental financial concepts and theories as well as the applications in making corporate financial decisions. The teaching content is composed of four parts. Part one introduces basic concepts in finance such as financial assets, opportunity cost, PVs, FVs, and NPVs. Part two demonstrates how to make firm investment decisions based on the calculation of project PV and other criteria. Part three explains why the opportunity cost of capital (the required rate of return, or the discount rate) is determined in the security market, or, the CAPM. Part four discusses financing decisions, mainly how to finance with debt and equity and decide the optimal capital structure.
