**UCEAP Semester Units**

3.00

### **Course Description**

In a time where jobs are getting more complex and individualized, employees who actively try to improve and shape their work situation play an important role in organizations. This proactive approach is known as job crafting. Employees shape and design their jobs in order to fit their personal needs, skills, or preferences. As part of this course, students form small groups and create and discuss intervention approaches for the facilitation of job crafting.
