UCEAP Semester Units
4.00

Course Description

This course offers a study of econometric methods at an intermediate level, with an emphasis on applications from macroeconomics and finance, the choice of an adequate model, the testing of assumptions, and the interpretation of results. The topics covered include modelling non-stationary time series and error correction models. The course discusses topics including the proper use of econometric methods in economic and business research; how to use the basic toolkit of econometrics, including software (EViews, Stata); and how to interpret applied econometric studies and how to evaluate them with regard to their theoretical and practical relevance.
