6.00

**UCEAP Semester Units**

4.00

## Course Description

The emphasis is on behavior, emotions, and motivational processes. The course presents how to analyze the environmental cause of behaviors, and how to use reinforcements, punishments and incentives to modify and motivate behavior. Clinical psychology focuses on emotional and motivational disorders, such as anxiety and depression, addiction, sexual disorders, and eating disorders. The way in which these processes arise and are shaped in people are presented in the section on developmental psychology. Neuroscience focuses on the evolutionary, genetic, neurobiological, and pharmacological mechanisms underlying the phenomena taught in the other sections.
