Course Description

This course provides an information set to properly assess investment opportunities using accounting publicly released information. The course includes: a review of basic accounting concepts and main tools; the analysis of financial statements; earnings quality analysis: determinants, economic consequences, and proxy; firms' valuation using the most common valuation techniques; and an overall understanding of role and responsibility of key players in the financial information field (analysts, investor relators, and so on). The course requires knowledge of basic financial accounting as a prerequisite.
