UCEAP Course Suffix
UCEAP Official Title CORPORATE FINANCE AND EQUITY VALUATION
UCEAP Transcript Title CORP FINANCE&EQUITY
UCEAP Quarter Units 4.00
UCEAP Semester Units 2.70

Course Description
This course explores the practice and theory of managerial decision making: How does a company make a decision to invest in a new production line? Does a firm's corporate governance structure impact firm value? What, if any, are the ethical aspects of finance? What tools are commonly used to determine the financial health of a company? Does it matter if a company pays dividends, and if so to whom? What tools are available to tell an investor the return she should expect from a stock? What risks are companies exposed to and how should they manage them? How much should a company pay for another in a merger situation? Much of this course is related to material that would typically be covered in the Chartered Financial Analyst examination at Level I and Level II for the corporate finance area.
